 - 6 EDUs to Twin Ponds
 - 5 EDUs to the Borough
 - 6 EDUs OASA is holding on to

- The Facilities Expansion Committee decided to apply for a loan from the US Department of Agriculture, in the amount of \$27 million. This will allow the following:
 - Osborn Lagoon
 - Improve existing treatment lagoon to full capacity
 - Build mechanical treatment plant

- They are leaving the current Act 537 plan in place with one more revision to reduce the scope in regard to detail. They plan on taking the numbers from the Regional Comprehensive Plan to come up with new Act 537 numbers, making it about one third its original size, in the hope it will go through DEP more quickly, in a way that will not jeopardize municipalities' reimbursements.

East Nottingham Township Historical Commission
Report for Aug. 10, 2009
Submitted by Ralph Denlinger – Chairman

The commission has completed the first phase of the Historic Resources Survey and received a proof copy in June from the County at the Annual Recognition Dinner of the Chester County Historic Preservation Network. Corrections were made and submitted back to the County. Within the next two months a wall map will be issued and a final copy of the Historic Atlas presented to East Nottingham Township. At this point the commission will enter phase two where we specifically research the sites. The Class 2 properties will receive priority. The Historical Commission has identified 466 sites within the township, of which about 170 are Class 2.

As we enter phase two, the amount of work needed increases. Additional help may be required to complete this phase due to increased time at West Chester and organizing the records at the Township Building.

The Historical Commission will finish placing items in the display cases and labeling the items. We would also like to sponsor speakers and meetings as have several other Historical commissions.

The Historical Commission has been contacted to survey a property at Hopewell and Forge Roads prior to demolition. The structure with components dating to circa 1800-1820 with an addition circa 1870-1890 was worth investigating trying to save as a test case, but internal modifications did not place it in the must save category. We have also been contacted by residents desiring advice and assistance in restoring historic structures.

It is desired that the Historical Commission be involved in such projects as the Lowe's distribution center. While very little has reportedly been done on this project, this is when concerns need to be addressed.
